Word 2010 - Images

Insert Pictures

Pictures and clip art can be inserted or copied into a document from many different sources, including downloaded from a clip art Web site provider, copied from a Web page, or inserted from a folder where you save pictures. You can also change how a picture or clip art is positioned with text within a document by using the Position and Wrap Text commands.

Tip: To insert a picture from your scanner or camera, use the software that came with your scanner or camera to transfer the picture to your computer. Save the picture, and then insert it by following the instructions for inserting a picture from a file.

Insert clip art

1. On the Insert tab, in the Illustrations group, click Clip Art.

Note Some commands shown are not available in Word Starter.

- In the Clip Art task pane, in the Search for text box, type a word or phrase that describes the clip art that you want, or type in all or some of the file name of the clip art.
- To modify your search, do one or both of the following:
 - To expand your search to include clip art on the Web, click the Include Office.com content checkbox.
 - To limit the search results to a specific media type, click the arrow in the Results should be box and select the check box next to Illustrations, Photographs, Videos, or Audio.
- Click Go.
- 5. In the list of results, click the clip art to insert it.

To resize clip art, select the clip art you've inserted in the document. To increase or decrease the size in one or more directions, drag a sizing handle away from or toward the center, while you do one of the following:

- To keep the center of an object in the same location, press and hold CTRL while you drag the sizing handle.
- To maintain the object's proportions, press and hold SHIFT while you drag the sizing handle.
- To both maintain the object's proportions and keep its center in the same location, press and hold both CTRL and SHIFT while you drag the sizing handle.

Insert a picture from a Web page

- Open the document.
- 2. From the Web page, drag the picture that you want into the Word document.

Make sure the picture that you choose is not a link to another Web page. If you drag a picture that is linked, it will be inserted in your document as a link instead of an image.

Insert a picture that includes a hyperlink from a Web page

- Open the Word document.
- On the Web page, right-click the picture you want, and then click Copy.
- In the Word document, right-click where you want to insert the picture, and then click Paste.

Insert a picture from a file

To insert a picture from your scanner or camera, use the software that came with your scanner or camera to transfer the picture to your computer. Save the picture, and then insert it by following these steps.

- Click where you want to insert the picture in your document.
- On the Insert tab, in the Illustrations group, click Picture.

Note Some commands shown are not available in Word Starter.

- Locate the picture that you want to insert. For example, you might have a picture file located in My Documents.
- Double-click the picture that you want to insert.

Note By default, Microsoft Word embeds to a picture. In the Insert Picture dialog box, click the arrow next to Insert, and then click Link to File.

To resize a picture, select the picture you've inserted in the document. To increase or decrease the size in one or more directions, drag a sizing handle away from or toward the center, while you do one of the following:

- To keep the center of an object in the same location, press and hold CTRL while you drag the sizing handle.
- To maintain the object's proportions, press and hold SHIFT while you drag the sizing handle.
- To both maintain the object's proportions and keep its center in the same location, press and hold both CTRL and SHIFT while you drag the sizing handle.

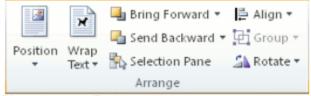

Keep a picture next to the text that goes with it or at a spot on the page

An inline picture keeps its position relative to a portion of the text. Pictures are inserted as inline pictures by default in Word.

A floating picture keeps its position relative to the page, and floats in that position as text flows around it. For example, if you position the picture halfway down on the left side of the page, and then you add two paragraphs at the top of the page, the picture will stay halfway down on the left side of the page.

To make sure that the picture stays with text that references it — for example, a description above the picture, position the picture as an inline picture. If you add two paragraphs above the description, the picture will move down the page together with the description.

- If the picture is not on a drawing canvas, select the picture. If the picture is on a drawing canvas, select the canvas.
- Under Picture Tools, on the Format tab, in the Arrange group, click Position.

If you don't see Position, click Arrange, and then click Position.

- Do one of the following:
 - To change an inline picture to a floating picture, select any one of the With Text Wrapping page position options.
 - To change a floating picture to an inline picture, select In Line with Text.

Keep a picture with a callout or a text box

An inline picture keeps its position relative to a portion of the text. Pictures are inserted as inline pictures by default in Word. To make sure that the picture stays with text that references it — for example, a description above the picture, position the picture as an inline picture. If you add two paragraphs above the description, the picture will move down the page together with the description.

A floating picture keeps its position relative to the page, and floats in that position as text flows around it. For example, if you position the picture halfway down on the left side of the page, and then you add two paragraphs at the top of the page, the picture will stay halfway down on the left side of the page.

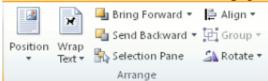

Note To keep a callout or text box with a picture, you must make the picture and the text box or shape floating, and group the picture with the callout or other shape.

- If the picture is not on a drawing canvas, select the picture. If the picture is on a drawing canvas, select the canvas.
- 2. On the Format tab, in the Arrange group, click Position.

If you don't see Position, click Arrange, and then click Position.

- To change an inline picture to a floating picture, select any one of the With Text Wrapping page position options, such as Tight.
- 4. On the Insert tab, in the Text group, click Text Box, and then click Draw Text Box.
- Click where you want the caption for the picture and draw the text box to size.
- 6. Type a caption in the text box.
- Select the text box.
- 8. On the Format tab, in the Arrange group, click Position.

If you don't see Position, click Arrange, and then click Position.

- To change an inline text box to a floating text box, select any one of the With Text Wrapping page position options, such as Tight.
- Select the picture and the caption, and then on the Format tab, in the Arrange group, click Group.

If you want to move the group you created with the text, select the group, and then on the Format tab, in the Arrange group, click Wrap Text, and then click In Line with Text.

Wrap text around a picture

You can use text-wrapping and positioning to arrange the images and text in your document.

Position a picture

- 1. In your Word document, click the image to select it.
- Click the contextual tools tab.

For example, if you select a photograph, click the Picture Tools tab.

If you select an AutoShape, click the **Drawing Tools** tab. If you select a SmartArt chart, click the SmartArt Tools Format tab.

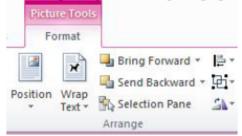

- In the Arrange group, click Position.
- 4. Under With Text Wrapping, click the location where you want to position the image.

Note If you click the In Line with Text option, your image stays with the text that comes before and after it.

Wrap text around a picture

- 1. In your Word document, click the image to select it.
- 2. Click the contextual tools tab.

For example, if you select a photograph or clip art, click the Picture Tools tab.

If you select an AutoShape, click the **Drawing Tools** tab. If you select a SmartArt chart, click the SmartArt Tools Format tab.

- 3. In the Arrange group, click Wrap Text.
- Do one of the following:
- Click Square to wrap text around the border of your image.
- Click Tight to wrap text closely around a clip art image or an irregularly shaped picture.
- Click Through and then click Edit Wrap Points to drag the wrap points closer to the image, so
 that text can fill in more of the negative space around the image.
- Click Top and Bottom to place the image on its own line.
- Click Behind Text to display the text over the image.
- Click In Front of Text to display the image over the text.
- Click More Layout Options and then click the Text Wrapping tab to change where the text
 wraps or the distance between the text and the image.

Add or delete captions

A caption is a numbered label, such as Figure 1, that you can add to a figure, a table, an equation, or another object.

Label that you select

2 Number that Microsoft Office Word inserts for you

You can vary the caption label and number format for different types of items — for example, Table II and Equation 1-A. You can also create a new caption label, such as Photo.

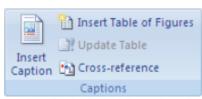

If you later add, delete, or move captions, you can easily update the caption numbers all at once.

Add captions

You can add captions to figures, equations, or other objects. You can also use those captions to create a table of the captioned items for example, a table of figures or a table of equations. If the objects in your document are formatted as floating objects, follow the instructions for adding captions to floating objects.

Add a caption

- 1. Select the object (table, equation, figure, or another object) that you want to add a caption to.
- On the References tab, in the Captions group, click Insert Caption.

- In the Label list, select the label that best describes the object, such as a picture or equation. If the list doesn't provide the correct label, click New Label, type the new label in the Label box, and then click OK.
- Type any text, including punctuation, that you want to appear after the label.
- 5. Select any other options you want.

Note Microsoft Office Word inserts captions as text, but it inserts the sequential caption number as a field. If your caption looks similar to {SEQ Table * ARABIC}, Word is displaying field codes. To see the field results, press ALT+F9, or right-click the field code and then click Toggle Field Codes on the shortcut menu.

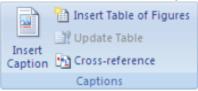

Add a caption to a floating object

If you want to be able to wrap text around the object and caption, or you want to be able to move the object and the caption together, you need to insert both the object and the caption into a text box.

On the Insert tab, in the Text group, click Text Box, and then click Draw Text Box.

- In your document, drag to draw the text box over the object.
- Under Text Box Tools, on the Format tab, in the Text Box Styles group, click Shape Fill, and then click No Fill.
- Under Text Box Tools, on the Format tab, in the Arrange group, click Text Wrapping, and then click the text wrapping option that you used for the object.
- 5. Under Text Box Tools, on the Format tab, in the Arrange group, click Send Behind Text.
- Select the object, and then click Cut in the Clipboard group on the Home tab. Or press CTRL+X.
- Click in the text box, and then click Paste in the Clipboard group on the Home tab. Or press CTRL+V.
- Select the object.
- 9. On the References tab, in the Captions group, click Insert Caption.

- 10. In the Label list, select the label that best describes the object, such as a picture or equation. If the list doesn't provide the correct label, click New Label, type the new label in the Label box, and then click OK.
- Type any text that you want to appear after the label.
- Select any other options that you want.
